A HEALTHIER, SAFER EMPLOYEE EXPERIENCE

For businesses building teams and organizational culture to compete in tomorrow's world, employee experience is a top priority. But delivering that optimal experience for your employees requires more than a beautiful, functional office space – it requires an environment that promotes their physical health and wellbeing, because your employees deserve a workspace where they can feel comfortable and safe.

Air quality is one of the most overlooked components of a healthy office, workplace or facility, as these shared spaces can be breeding grounds for air pollutants like viruses, bacteria, dust, allergens, odors and harsh chemicals.

Unfortunately, many organizations struggle to protect employee health. The CDC estimates that the US economy loses \$225.8 billion in productivity annually due to sick days, which equates to \$1,685 per employee. One major source of those sick days is poor indoor air quality, where germs, viruses and bacteria can quickly spread from employee to employee and from visitor to visitor. In addition to physical health risks, poor air quality can lead to degraded employee morale, camaraderie and productivity.

Organizations need a robust air purification strategy to create environments for employees to thrive.

EMPLOYEE PERCEPTIONS OF THEIR WORKPLACE

Majority of respondents think their employer is taking the necessary steps to provide clean indoor air in their workplace.

But only 36% describe it as very clean.

Respondents agree that clean indoor air helps them perform their best at work.

88% of people believe "Clean indoor air should be a right for all employees."

THE SOCIAL SCIENCE OF SAFE AIR

According to experts and research studies, effective air purification can transform how employees respond to their work environment. This leads to a range of broad benefits including:

Improved Productivity

Reducing Absenteeism and Presenteeism

Improved Facility Perceptions

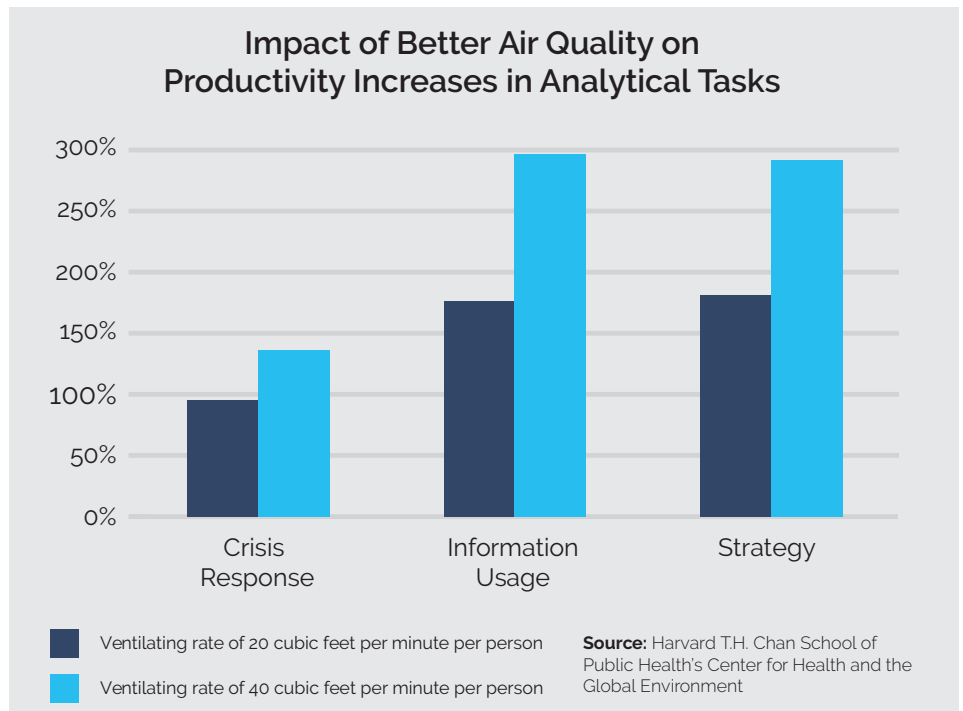

Reducing Common Complaints Such as Odors

Creating a More Positive, Health-Focused Environment

But office perceptions and baseline productivity are not the only outcomes of healthier air within a building, the quality of the work itself improves. The Harvard University T.H. Chan School of Public Health found better indoor air quality led to improved cognitive functions such as crisis response, information usage, and strategy – all valuable employee skills for any organization.

POWERFUL PROTECTION FROM FELLOWES

While ensuring the health of your organization's employees and guests may seem like a daunting challenge, the right equipment makes all the difference. Fellowes® air purifiers offer extensive protection against dangerous airborne viruses, as proven by independent testing and third-party standards. In three different independent laboratory tests, the AeraMax® Pro air purifiers demonstrated an ability to remove over 99.9% of SARS-CoV-2, Coronavirus and H1N1 viruses.

Test results available at <https://www.fellowes.com/us/en/air-purifiers/resources/research-materials.aspx>

You can easily provide proven maximum protection by making your facility safer and healthier – with Fellowes® AeraMax® Pro air purifiers.

LARGE OFFICE WORKSPACES

Presentation Halls, Conference Rooms, Open Flex Spaces

Large meeting spaces are often cross-functional—facilitating corporate meetings, group training and more. As these areas host large groups, virus transmission is always a top concern. AeraMax Pro provides an impressive rate of air change per hour, which helps eliminate airborne viruses. It also helps remove unwanted odors left from food or trash bins in the space.

BREAKROOMS AND CAFETERIAS

In areas where employees gather to enjoy lunch or breaks, it's important to protect against the spread of airborne illness or allergens. Unpleasant odors from lunches, snacks, garbage and more may also linger in the air, preventing relaxation and connection necessary for better productivity. AeraMax Pro's H13 True HEPA filtration removes 99.95% of particles as small as 0.1 microns, ensuring employees feel rejuvenated and protected during relaxation.

LOBBIES AND RECEPTION AREAS

High-traffic environments—such as lobbies and waiting rooms—can be an area of risk for viral and germ transmission. Fellowes air purifiers with PureView™ Technology make the invisible visible with real-time status updates as the air is cleaned. Using the built-in display, employees and guests can see air filtration progress, as well as a notification when the air is clean. These intuitive features assure employees and guests that the business cares about their safety, while providing peace of mind that the air they breathe is clean.

RESTROOMS

Create a positive first—and lasting—impression of your facilities

These facilities are a breeding ground for bacteria, germs, and odors. Consider this: The human brain can process roughly 10,000 different smells in an area the size of a postage stamp. Because the human sense of smell is often linked to memory and how a person feels, many high-traffic public-facing businesses make it a priority to combat malodor and create a better air care environment, especially in restrooms. A restroom that smells bad is usually thought to be dirty and unsanitary by the user, leaving behind a bad impression of your business. Equal to hygiene and sanitizing practices, proper restroom air care and odor elimination have become top of mind for public facilities.

COLLABORATIVE SPACES

Whiteboard rooms, shared office spaces and common areas are perfect for spontaneous ideation, creative problem solving and workshopping. Empowering teams to solve complex challenges often means increased exposure to airborne contaminants. Fellowes AeraMax Pro features an antimicrobial treatment to the H13 True HEPA filter, which inhibits the growth of odor and stain-causing microorganisms, improves the filter lifespan and ensures teams are protected even during the longest brainstorming sessions.

LOCKER AND EXERCISE ROOMS

Corporate Gyms, Spas, Fitness Centers

Wipes are not the only preventative measures needed for cleaning fitness facilities. Gyms and locker rooms are often difficult to keep clean, and can be breeding grounds for germs and odors. Ensure the health and comfort of your employees with air purification that removes up to 99.97% of airborne contaminants as small as 0.3 microns, reduces odors in close quarters and provides up to 5 air exchanges per hour as recommended by the CDC.

SENSE & REACT

Only Fellowes Air Purifiers sense and react to changes in air quality and occupancy while showing you when the air is clean.

Because air contaminants flow from room to room and spaces are used with irregular frequency throughout the day, traditional air purifiers are often inefficient and ineffective at providing air purification when it is needed. Fellowes AeraMax Pro is the only air purification system that has integrated sensors that actively monitor the air quality and occupancy levels in a room, with an intuitive display showing real-time air data. When the system senses a change in purification demand, it automatically adjusts settings for optimized purification at all times.

This patented sensor technology and display makes the invisible visible with real time status updates as the air is cleaned. It provides maximum peace of mind that the air your students and staff breathe is clean.

Fellowes' proprietary and patented EnviroSmart technology enables AeraMax Pro air purifiers to continuously monitor your environment and automatically adjust to clean the air, conserve energy and reduce operating costs.

Fellowes Air Purifiers Are Smart

For over a decade Fellowes AeraMax Pro air purifiers have been a leading choice for localized air purification. Fellowes is the only solution that combines H13 True HEPA filtration (AM3 and AM4) with EnviroSmart and PureView Technologies.

Our proprietary and patented EnviroSmart technology enables AeraMax Pro commercial-grade air purifiers to continuously monitor your environment and automatically adjust to clean the air, conserve energy and reduce operating costs.

PureView's patented sensor technology and display makes the invisible visible with real time status updates as the air is cleaned. It provides maximum peace of mind that the air you and others breathe is clean.

Integrated

A Seamless Addition

AeraMax Pro was designed to seamlessly integrate into your space, whether on the floor, wall-mounted or recessed into the wall. All models are unobtrusive and aesthetically pleasing, so you can provide worry-free air purification wherever it's needed most.

Reliable

Commercial Grade Durability

AeraMax Pro commercial-grade air purifiers are built to last, with high-quality components ensuring your unit is reliable, durable, and tamper-proof.

THE AERAMAX PRO LINE UP

AeraMax Pro room size recommendations are based on delivering the recommended 3-5 Air Changes per Hour (ACH).
