Discover how AeraMax[®] Pro air purifiers help to provide a nursery with clean air

Borne Childcare Foundation Location: Borne, The Netherlands.

The problem

Borne Childcare Foundation is a childcare center with multiple sites. Nina Brouwer manages 5 sites and one of these, which is rented from the council, is outdated. While they were considering air purification, the Coronavirus pandemic was emerging. Additionally, there were also a number of complaints of headaches, which became another reason to start the trial.

The solution

They wanted proof that air purifiers really work so they had a trial placement of AeraMax Pro units installed.

An air measurement was taken by GZ and Fellowes to measure the number of polluted particles in the air and demonstrate effectiveness of the air purifiers. The machines had only been on trial a number of weeks and there was a noticeable difference. 'I am not an expert in the field of virus spread and air cleaning, but the employees have fewer headaches and we can feel that the air is much purer', says Nina Brouwer, manager, Borne Childcare.

After the test, 3 air purifiers were purchased for the De Wingerd site. Particularly for older locations, where ventilation may not be optimal, the use of air purifiers adds large value.

Fellowes AeraMax Pro air purifiers remove at least 99.95% of harmful viruses, bacteria, odors, allergens and pollen down to 0.1 microns or even smaller. Recently, Fellowes Air Purifiers have Proven to eliminate over 99.99% of COVID-19*.

AIR PURIFIERS

The result

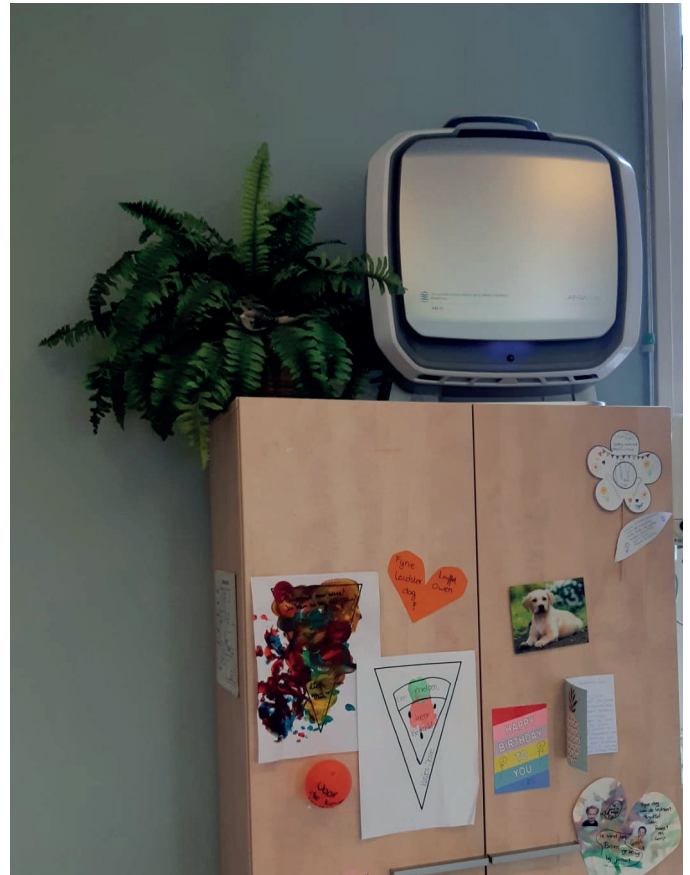

The employees are very satisfied. Besides the fact that there are fewer complaints of headaches and the air is noticeably cleaner, there is also the side effect of fewer odors. 'We did not necessarily expect this, but it also removes the odors from the air, which is very pleasant'.

They were also very pleased that Fellowes and GZ came on site to do the installation and to explain the different settings of the machine

'One of the devices is placed in the changing room and we have noticed that the odors have disappeared in that area'.

Nina Brouwer, Manager, Borne childcare
