

CASE STUDY

Discover how AeraMax[®] Pro helps to provide a pharmacy with clean air.

Dag,
ik ben SARA
van Service
Apotheek!

Case study: Apotheek Nieuwland Location: Schiedam, The Netherlands

The problem

Apotheek Nieuwland is part of Service Apotheek, a group of 475 pharmacies. Its primary task is providing people with medicine and giving guidance on how to use them.

The team was looking for a product which utilizes HEPA filtration, because it can effectively capture aerosols that various studies have shown to play an important role in the transmission of Coronavirus. To prevent contamination and reduce the number of complaints in the workplace, AeraMax Pro was a smart choice to compliment the ventilation system.

The solution

Three AeraMax Pro models were installed (AM2 and AM3) and a mix of wall-mounted and floor-stand models were chosen, for maximum flexibility in the various areas of the pharmacy.

AeraMax Pro air purifiers were an affordable and flexible solution.

'Because of AeraMax Pro, employees experience fewer headaches and the typical pharmacy smell has disappeared'

W.H. Tijmons - Pharmacist

AIR PURIFIERS

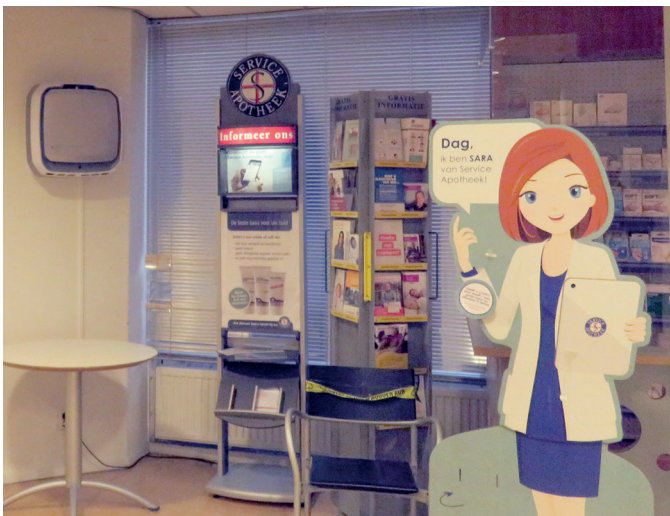

The result

'We are very pleased with the use of AeraMax Pro to protect us from the Coronavirus and to prevent infections.

Our employees experience fewer headaches, are less bothered by fine dust at the printers and the typical pharmacy smell has disappeared. It is also nice for customers that they can enter a safe environment with fresh air.

The machines are very easy to use and I would recommend them to everyone'

W.H. Tijmons - Pharmacist
