WORK BETTER™

Don't Take Risks with Sensitive Information

With the increased use of mobile devices, government employees, now more than ever, are at risk of compromising confidential information.

50% of federal employees use their personal devices to access work email or download work documents*

40% who work under rules prohibiting personal device use at work say the rules have little to no impact on their behavior

Government employees often work with extra sensitive information, including social security numbers and fingerprints

HIPAA, HITECH and FISMA require government agencies to protect sensitive information from security risks or face fines**

GOVERNMENT

Fellowes® **PrivaScreen™** Blackout Privacy Filters protect the public's sensitive information from being viewed by unauthorized people. Keep your agency compliant with critical privacy regulations, including HIPAA, HITECH and FISMA.

PrivaScreen™ Blackout Privacy Filters **Privacy You Can Trust.**
