

# Get the Most Out of Your Desk

At Fellowes, we believe movement is life. That's why our complete suite of height adjustable solutions centers on people doing what they were intended to do — move, collaborate and invigorate.

Our objective is simple; create a more healthful work environment — serving businesses in their quest to reduce absenteeism, while boosting productivity. But it does something else, too. It grows presenteeism — the active participation of employees in the workplace, because they are invigorated, refreshed and engaged. And that can yield benefits for years to come.

## Add movement to your workday and feel the benefits!

- Standing at your desk helps improve your mood and energy levels
- Alternating sitting and standing can help reduce back pain
- Standing is better for helping maintain important brain structures essential for memory formation
- People who use sit-stand workstations experience less daily anxiety and improved job performance, work engagement and overall quality of life

Work Better, Feel Better™
